

The Virginia SATSLab, Inc. (VSATS) is a public-private partnership whose mission is to research, develop, and implement a portfolio of aviation technologies and practices that promote economic development in Virginia communities through a safe, secure, accessible air transportation system. A VSATS objective is to enhance and help promote the deployment of the concept of small General Aviation aircraft providing greater access for a wider segment of the traveling public using General Aviation airports throughout Virginia.

VSATS is partnering with the Air Taxi Association, vendors providing on-demand air taxi and aircraft charter services, the Virginia public-use airport community, and the Virginia Department of Aviation. This partnership is intended to help incubate the on-demand air taxi business sector, as well as assist existing air charter services by providing a web-based travel portal through which citizens may access and procure these type services.

VSATS is registered as a 501 (c) 3 not-for-profit corporation with the Virginia State Corporation Commission.
